

Off-Premise Alcohol Retailer

State law requires training in the E.A.S.Y Program for each store employee that sells alcohol or directly supervises the sale of alcohol for off-premise consumption (i.e. gas stations, convenient stores, grocery stores). This training must be done before an individual begins to work as staff of an off-premise beer retailer. After participating in an E.A.S.Y training, retailers will receive an off-premise certification which must be renewed every 3 years (effective May 3, 2023).

Training Options

Retailers can create and submit their own training program for approval, hire a trainer to train their staff on-site, purchase training for their own staff, or take individual training online.
